This addendum addresses the following pages in DOC-0017-000E, *User Guide for the Image MASSter 2000i*:

Page 8, *Introduction*

Page 13, *Copy Mode & Setting Descriptions*

Pages 27, 29, *PC-Host Installation*

Page 41, *FAQs*

Page 54, *Database*

**The following correction is noted:**

The *IM2000i* has the ability to operate as a standalone unit. Using the *IM2000i* Toolkit application, the *IM2000i* can also be linked to a PC host running in Windows 95/98 for expanded capability and graphic ease-of-use. The *IM2000i* Toolkit application currently does *not* operate under the Windows 2000 operating system.

The PC must have the following requirements in order to run the *Image MASSter 2000's* Toolkit software program:

- 486 or Pentium class processor
- Windows 95/98
- 8 MB RAM
- 1 MB hard disk space free
- Parallel port compatible with EPP.
